- Federal Correction Complex-Beaumont (1230092): On the afternoon of 9/4/17, staff spoke with the warden for this facility. The warden has notified TCEQ staff that the prison complex will be out of potable water by Thursday morning if service from the City of Beaumont is not restored. The prison is currently on strict water rations and has approximately 0.5 million gallons left in the elevated storage tank. The prison is also currently hauling in non-potable water for the AC chillers. Staff forwarded the TCEQ list of approved water haulers throughout the state and the warden is having his Emergency Operations Center staff contact those water haulers for potential deliveries. If they are unable to secure any

water deliveries, TCEQ staff will help the prison locate emergency water haulers.  
As a last resort the prison does have an evacuation plan in place.

THANK YOU!!!!
